Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-11 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 1-7 is/are allowed.
- 6) ☒ Claim(s) 8-11 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 15 April 2005 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

DETAILED ACTION

Claim Objections

1. Claim 11 is objected to because of the following informalities: the term "eg" is ambiguous, as it is not clear if the limitation following is required for defining the scope of the invention. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The term "Scotch disc" has not been defined, and it cannot be reasonably determined what a Scotch disc is.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 8-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP 5-146558. Please refer to figure

1 and the attached English language translation. '558 discloses scissors having two halves, each half including a blade, shank and ring and articulately coupled by means of a lock and including hard metal edges on the blades, the edges formed as massive elements extending over the entire thickness of the blades on mutually facing faces of the blades. It is noted that claim 8 contains a "product-by-process" limitation: "which are formed by welding application of a hard metal and a subsequent grinding step". MPEP 2113 states in part: "[E]ven though product-by-process claims are limited by and defined by the process, determination of patentability is based on the product itself. The patentability of a product does not depend on its method of production. If the product in the product-by-process claim is the same as or obvious from a product of the prior art, the claim is unpatentable even though the prior product was made by a different process." In re Thorpe, 777 F.2d 695, 698, 227 USPQ 964, 966 (Fed. Cir. 1985). Here, the resulting product appears to be the same as that disclosed by JP '558, that of a scissor blade with hard metal edges on the blades, the edges formed as massive elements extending over the entire thickness of the blades on mutually facing faces of the blades. If applicant argues that the steps of welding and grinding form a different product, he must provide evidence of such difference.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over JP 5-146558. '558 discloses that the hard metal is a cobalt alloy, but not the particular alloy claimed as an example of an appropriate alloy. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have made the scissors' edge of any desired hard metal alloy, since it has been held to be within the

general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416. Here, applicant has not specifically pointed out the criticality of using the claimed alloy, but has disclosed it as an example of the various alloys that may be used.

Allowable Subject Matter

7. Claims 1-7 are allowed.

8. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or fairly teach a method of making a cutting edge, including pre-shaping the blade by a predetermined degree of curvature in the direction facing away from the blade, the pre-shaping substantially neutralized by the heat of the welding process to bring the blade back into a final shape. The closest art, to JP 5-146558, does not disclose such shaping.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar hard edged tools and methods of making are cited of interest.
